INFOTC 3380 Database Systems and Applications

This course covers database management systems (DBMS) and the development of applications that utilize databases including relational/SQL and NoSQL types. Topics include the evolution of

Syllabus

data storage and databases, data modeling, relational and NoSQL databases, SQL, document, graph and key-value storage and retrieval, application development using databases, database scaling, database trends, and popular database systems. **Learning Outcomes**

Students will:

 Understand the differences between SQL and NoSQL databases. • Select the appropriate database type for the use case.

- Understand what is meant by polyglot persistence. Be proficient in using relational, document, graph, and key-value database systems.
- Be able to design database schemas. Be proficient in SQL.
- Be proficient in data storage and retrieval using NoSQL databases.
- Understand and apply the concepts of indexing, concurrency, recovery, and transactions. Be able to develop applications that utilize databases.
- Develop an introductory understanding of database scaling.
- 100% online course.
- You must own, or have access to, a computer to take this course on which you can install software. If you are in Columbia, MO while taking the course you can use the iMac lab in C1205/06 Lafferre. The iMac lab has all the required software installed on the computers.

Credit Hours 3 hours

C- or higher in CMP_SC 2050 or INFOTC 2040 or experience developing applications and permission of the instructor.

Monday, August 20 - Fall classes officially begin. Monday, September 24 - Last day to drop the course without a grade. Saturday, November 17 - Sunday, November 25 - Thanksgiving Break Monday, December, 3 - Last day to withdraw from a course.

The course officially starts on Monday, August 20. Your access to Canvas and the first week's modules are available on Saturday, August 18. Each week you are provided with new modules on

Class Schedule (example, dates change)

Saturday and the work needs to be completed by the following Friday. Assignment, quiz and test

Assignments

All assignments (quizzes, exams, activities, challenges, and projects) must be completed by the due date/time to receive credit.

You must fulfill the requirements of an assignment submission to receive credit for that

present to receive credit for the assignment. If you are asked to follow a specific procedure or utilize a convention you must do so to receive credit. For example, if you are asked to name a project in a specific way and you do not follow the rules provided you will receive a zero on the assignment. If you are unsure of what you are to do you must ask and receive clarification before submitting your work.

There is no required textbook for this course. The materials required for the course are provided

 Attend to the work you have to do. Do not put it off. Make it part of your schedule. Do not try to do all of the work just before the course ends. Ask questions if you do not understand something. Engage in discussions on the class discussion boards. Ask for help if you get lost. Use the e-learning mentors!

Instructor's Expectations for Students

Be responsible for yourself, your work, and your actions.

Do not wait until late in the semester to address problems.

Be creative, curious, inventive, resourceful, and proactive.

Be playful in your approach to learning and the work you do.

Do not ask the instructor to break class policies.

learning guides, online lecture videos and content, and lab book (i.e. course pack) are property of the instructor and University and may not be shared online or distributed in any manner to others. Students are prohibited from posting course materials or notes online and from selling notes to or permission of the professor teaching this course. Doing so will constitute both an academic integrity violation and a copyright violation. Violations of copyright laws could subject you to civil penalties and criminal liability. Violations of academic integrity may subject you to disciplinary action under University policies.

Classroom misconduct is defined by the University of Missouri's collected rules and regulations

https://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_con

Classroom misconduct includes forgery of class attendance; obstruction or disruption of teaching,

including late arrival or early departure; failure to turn off cellular telephones leading to disruption of teaching; playing games or surfing the Internet on laptop computers unless instructed to do so;

harassment, bullying, physical abuse or safety threats; theft; property damage; disruptive, lewd or
